Project title:SmartAg

Client &/Advisor: Swarmy Pompandi & Colin Hurd

Team Members/Role:

Alex Clark	Team Leader
Alex Peck	Tech Lead
Chandler Heisler	Communications
Kurry Watson	Webmaster

✓ Weekly Summary (Short summary about what you did this week)

Received new requirements for the programming language which meant we are starting over as far as modding goes. We met with our client and Ram to help us get a better understanding on javascript and how we will be using it for this project.

✓ Past week accomplishments (please describe as what was done, by whom, when)

- ❖ We all looked into videos sent by our client, and touched base on the javascript language (team)
- ❖ Attended a Javascript learning session with our client and SriRam, an embedded systems expert who will be helping us during this project. (team)
- ❖ Continued working on the website (Kurry)

✓ Pending issues (if applicable)

- ❖ Teams understanding of javascript is not up to date, will need to brush up/learn more to progress with the project
- ❖ There seems to be issues with our website (we are currently emailing etg@iastate.edu)

✓ Individual contributions

<u>NAME</u>	<u>Individual Contribution</u>	<u>Hours this week</u>	<u>HOURS cumulative</u>

✓ Comments and extended discussion

This week, when meeting with our client, we hashed out exactly what our project will be in the future with the addition of react. With the new javascript language change with react, we will be restructuring how we set up our server, and how information will be stored within a database.

✓ Plan for coming week (please describe as what, who, when)

- ❖ Get up to speed with javascript and react
 - Personal study (Videos/personal projects)
 - Javascript demo/lab jams with SriRam(an embedded systems expert colin knows who is going to help us with the project)
